

Prisca Lobjoy's short biography

Prisca Lobjoy has been creating the entire visual environment of the Gotan Project since the band's beginnings. Through her album art design and the many music videos she has directed, she has been nourishing her musical universe. She directed the video for "Diferente"; the film "La Revancha del Tango live", that came out on DVD; the many video sequences that the band uses on stage; and the short film "Sentimentale", between dance and fiction, inspired by the music of Gotan and its Argentinian imagery.

She spent a lot of time with the band during their live shows and their tours, especially in Australia in 2007, and brought back with her many memories and even more photographs, which are brought together in this book. They convey her particular attention to furtive moments and passing sensations, faithfully and poetically reflecting this musical and human adventure.
